

SILKFLOW SIRIUS NEW GENERATION WATER SOFTENERS

The ultimate, non-electric block salt water softener

What are the benefits of softened water?

The Sirius Water Softener offers many benefits to you, your home and family. Hard water causes unsightly deposits of limescale on sink surfaces, taps and shower screens. The introduction of softened water will eliminate the residue from your kitchen and bathroom, so they will sparkle without extra scrubbing. You will therefore use fewer cleaning products, saving money on your weekly shop.

Softened water lathers better, so you will find you actually use fewer products throughout the whole of your home too.

With fewer products needed on skin, dry conditions such as eczema can be soothed. Hair will feel softer with even less conditioner.

How does a water softener work?

It is a simple process that works through ion exchange. Both cylinders are filled with tiny beads that trap the calcium and magnesium hardness minerals allowing softened water to enter your home.

Non-electric, great efficiency and low running costs

With no timers, motors, adjustments or complicated programming, the Sirius Water Softeners makes water softening simple. It's non-electric so the only cost involved is replenishing the salt.

What is a Silkflow Water Softener and why is it so special?

The Sirius Water Softener is the 4th generation in water softener design. Its advanced twin cylinder technology is extremely efficient and means you will have softened water 24 hours a day, 7 days a week. It conveniently runs on block salt, which is easier to handle, store and load compared to tablet salt. It's compact and fits under your kitchen sink.

Smart shuttle metering

Using breakthrough technology, this water softener includes smart shuttle metering, which is designed and manufactured to cater for the intricacies of all British plumbing systems. From tanks in the loft to combination boilers and high flow unvented hot water cylinders, this water softener does the job.

Accurate metering for maximum flow rates

Displacement meters allow our water softeners to regenerate with absolute accuracy, giving it a huge advantage over other designs that use less accurate paddle wheel metering systems.

Low pressure design performance

An enhancement feature that ensures your water softener performs to its full potential. Whether your water is supplied at a lower pressure or your family requirements cause fluctuations in pressure, our low pressure injector ensures maximum reliability.

High flow rates

Our water softener is designed for all homes and works with all types of plumbing systems. With a flow rate of 56 litres per minute (with minimal pressure loss), this is the water softener for you and your home.

Robust tested

Built for maximum durability. Robust tested for total reliability and tested beyond UK standard.

Twin parallel cylinder system

The twin cylinder allows for softened water 24 hours a day with more than enough capacity to supply softened water to a large family. Our parallel system ensures water is fresh for you and your family.

Adjustable brine valve

The adjustable brine valve allows the Sirius Water Softener to be fine tuned keeping it at the best efficiency for both salt and water usage.

SPECIFICATIONS

Dimensions	Height	490mm
	Width	206mm
	Depth	445mm
Maximum Peak Flow Rate	56 litres per min	
Water Pressure	Min	1 bar
	Max	8 bar*
Regeneration	Time	11 mins approx
	Water	17 litres

* PRV recommended at 6 bar

Easy to fill with block salt

Easy to handle block salt

A solution that takes the hassle out of refilling your water softener. Unlike traditional tablet salt which comes in heavy 25kg sacks, block salt comes in lightweight 4kg bricks. Filling your water softener is simple. Typically salt usage is one block per person each month.
